

REALTIME-RISK

Your Arc Flash and Shock Risk Assessment tool in the Cloud

**Track and manage your tools easier than you have ever imagined:
Track tools for:**

- Who is assigned to or what location
- Out of service and/or expected return alerts
- Scheduled for service with notifications
- Employees request and notification of service needs
- Prevent too many or too few
- Know in advance if the same tool is needed for multiple jobs

Knowing where your tools are and their condition can give you the ability to assure all your tools are “making you money!”
